## DRIFT TELETHON # 2

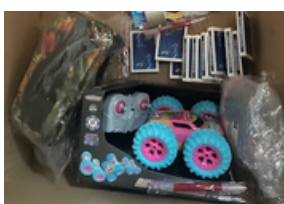

by Aaron C & Lou.

## CHRISTMAS GIFTS

Precious, Emy and Kéressia did all the folding for the gifts sent to the partners' libraries ! Boxes were sent on 03/12/24!

For those in need, the school organises the collection of boxes to give to the Secours Populaire, a charity.

The Drift Téléthon #2 was organized by Mrs & Mr Ternier to collect money to help create treatments for genetic diseases. It took place on the circuit in Salbris, near Bourges. Mrs Ternier teaches Spanish & French while Mr Ternier teaches car mechanics. There were about **2,200 people** during the week end & we hope that it would have collected a lot of money !

People could do first time three rounds drift, there were clothes & food stalls, Drift & F4 simulators, a market place and RC mini drift cars to have fun with !

# OUR SHOP

LP Vauvert has a micro market in its walls !  
The CAP class (students training for a GSCE in trade) are managing it. They sell many things : from jewellery to food... and everything comes from the area.  
This makes possible for the students to learn how to organise a full shop, from stock to selling. You can come to find christmas gifts !

## CULTURAL POINT

by Zoé & Lotti.

**The Butler Review** - 22/11/24

We both liked it very much: the filming was interesting. We think that it should more represent the real Cecil's story because there are inconsistencies and modifications.

My favourite part is when Cecil, a black man, is respected and liked by the presidents.

I recommend this movie because the cause is important and it represents well the problems that black people have in their daily life in the USA and in the world. The story is interesting too.

## EL RINCÓN DEL CURIOSO

El 4 de diciembre 2024.

### Traditiones navidenas españolas : los dulces mantecados

La historia de los mantecados en España empezó en Andalucía, en el siglo XVI. Su origen es muy divertido y sencillo: Andalucía tenía un exceso de producción de manteca y maíz en aquella época, así que tuvieron que pensar en nuevas formas de gastar todo eso. ¡Y se les ocurrió el mantecado!

La receta se extendió rápidamente por toda España. Estepa, situada cerca de Sevilla, concentra la gran mayoría de las fábricas de mantecados, y es el paraíso del mantecado. Aquí se puede incluso visitar el Museo del Mantecado.

Le film *Tiempos de azúcar* te donnera la recette ! Juan Luis Ibarra, 2001.

## STUDENT'S WORDS

an interview by Kélia.

**Malo** chose to integrate the Euro Class to upgrade his level in English and to have more opportunities to go on in his studies after the BAC. He is in second year motorcycle mechanics and will probably go on training period in Vila Nova de Milfontes, Portugal.
